Code	No: 135AY JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY HYDERABAD								
AG	B. Tech III Year I Semester Examinations, December - 2019 LINEAR AND DIGITAL IC APPLICATIONS (Common to ECE, EIE, ETM)								
Time	: 3 Hours Max. Marks: 75								
Note:	This question paper contains two parts A and B. Part A is compulsory which carries 25 marks. Answer all questions in Part A. Part B consists of 5 Units. Answer any one full question from each unit. Each question carries 10 marks and may have a b as sub questions.	A							
	PART-A								
(25 Marks)									
1.a) b)	List the AC Characteristics of Op-Amp. [2] Significance and definition of upper and lower threshold points of a Schmitt trigger.	A							
AG_{d}	List out the applications of 555 timer. Why the Reset pin of IC 555 is normally connected to Vcc? [3]	<u> </u>							
e) f)	Give the principal of weighted resistor type DAC. Define the following terms as related to DAC: i) Linearity ii) Resolution What is the purpose of priority encoders?								
	Realize NOR gate with CMOS circuit. List the applications of ROM. Differentiate Static RAM and dynamic RAM. [3] [3] [3] [3]	\triangle							
	PART – B								
	(50 Marks)								
△ (¬².a) ¬ b)	Explain significance of virtual ground in an op-amp. An IC op-amp 741 used as an inverting amplifier with a gain of 100. The voltage gain vs frequency characteristics id flat up to 12KHz. Find the maximum peak to peak input signal that can be feed without causing any distortion to the output. [5+5] OR	_							
3.a) b)	Explain effect of bias current on output voltage. Design a practical integrator circuit with a DC gain of 10, to integrate a square wave of 10KHz.	Λ							
\triangle $\boxed{4}$.a)	Draw the schematic diagram of monostable multivibrator using IC 555 timer and	<i>F</i>							
b)	How to generate a sawtooth wave form? Explain the working of such a circuit with near circuit diagram. [5+5]								
5.a)	For all pass filters, the values of R and C are 7.95K and 0.02µF respectively. If the input frequency is 1.5 KHz, calculate the phase shift why is capture range always smaller than the lock in range? Explain. [5+5]	<u></u>							
1 1 1 1	A Company of the Comp
